DigiByte Media Info Sheet

Tried & Tested Tech

The DigiByte blockchain has been battle-hardened and tested since 2014, based on the most proven blockchain technology.

World's Longest UTXO Blockchain

Growing over 9 million blocks, the DigiByte blockchain has encountered and overcome scalability issues not yet seen by most other major blockchains. These innovations will continue into ongoing development.

Large Community

DigiByte has one of the largest, most engaged and decentralized communities in today's blockchain space, adding new users every day.

More Resistant to Hacking Control

DigiByte security is far more resilient to a 51% attack than other leading blockchains, making it an ideal asset for protecting valuable data.

WWW.DIGIBYTE.IO

DigiByte (DGB) is a rapidly growing global blockchain with a focus on cybersecurity for digital payments & decentralized applications. Over 5 years, DigiByte has become the world's fastest, longest and most decentralized UTXO blockchain.

Factsheet

Inception: **Jan 10th 2014**

Ticker: **DGB**

Concept: **PoW**

Creator: **Jared Tate**

Max supply: **21.000.000.000**

Block time: **15sec**

Max TPS: **~1066 (SegWit weighted)**

Fees: **Negligible**

Nodes: **15.000+ active**

Code: **Open Source MIT Licensed**

Wallets: **Windows, Linux**

macOS, iOS, Android, Hardware

Premine: **0.5%**

Mining: **5 algorithms**

Difficulty: **Adaptive - Realtime**

Tech: **DigiShield, MultiAlgo,**

MultiShield, SegWit, Dandelion++

Security: **High**
